TELEMEDICINE TECHNOLOGIES, publisher of collaborative e-Health solutions, CleanWeb in the field of Clinical Research and VisionHM for the management of patient pathways in healthcare establishments, announces the opening of new premises in Laval.

After the opening of its Belgian subsidiary in Liège a year ago, Telemedicine Technologies continues its growth and has just inaugurated new premises in Laval which house a young team of developers to support its Research and Development activities.

The President of Telemedicine Technologies, Yoani Matsakis, and his Technical Director, Hocine Mokhtari, were present in Laval this week for the inauguration of the site with his teams:

We are delighted to welcome promising young people to our team of developers, who will bring a fresh perspective to our activities and will be invaluable in supporting our growth
